

# Silicone remover complete set

## Silikon-Entferner Komplett-Set

### Area of application:

Removes fresh and hardened silicone residues from ceramic tiles, glass, enamel, metal and similar surfaces. Thanks to its gel formula, it is also suitable for vertical surfaces.

### Features

- Complete set:  
150 ml silicone remover, 1 brush,  
1 special sponge
- Removes fresh and hardened silicone residues
- Gel formula — also suitable for vertical surfaces

### Technical data:

Raw material base: Solvent, anionic surfactant, thickening agent, additives

Density: approx. 0.8 g/cm

### Processing:

Cut out the silicone joint with a sharp knife. Shake the bottle well before use. Apply the silicone remover to the residues with a brush and leave to work for between 10 minutes and 6 hours. Remove the dissolved residue with the special sponge. Wash the sponge thoroughly with household cleaner after every 1 m of joint length. Then rinse the surface thoroughly with water. Repeat the application for more stubborn residues. Before re-grouting, rub the adhesive surfaces thoroughly dry with a clean cloth.

### Notes

Wear suitable protective gloves during use. Before using the product, test its compatibility with the surface on a small area, as sensitive surfaces may be damaged. Treat metals only briefly and rinse thoroughly. Clean tools with water after use.

Please refer to the safety data sheet for safety-related information. Current safety data sheets are available on our website [www.pufas.de](http://www.pufas.de) / [www.decotric.de](http://www.decotric.de) or at [sds@pufas.de](mailto:sds@pufas.de) / [sds@decotric.de](mailto:sds@decotric.de).

### Storage:

Keep tightly closed, dry, child-proof and cool, but

Store in a frost-free place.

### Disposal:

Only recycle containers that are completely empty. Dried material residues can be disposed of with household waste or as construction site waste. EWC waste Key No. 08 01 12.
