

Pufas Click-Safe PUFAS Laminat - Fugenschutz Click-Safe

Instructions for use:

Pufas Click-Safe is suitable for sealing the butt joints of all commercially available laminate and finished parquet floors which are laid using the 'click technique'.

Pufas Click-Safe protects lastingly against effects of moisture and dirt. The compound is transparent and waterproof after drying.

Please note: Any laminate dismantling for a secondary use will no longer be possible after the application *Pufas Click-Safe*.

Technical data:

Components:	sterene acrylate dispersion
Density:	approx. 1.0 g/ml
pH value:	approx. 8-9
Viscosity:	approx. 10,000-12,000 mPa s
Consumption:	250 g for 10-15 m ²

Material preparation:

The groove and spring surfaces must be clean, free of grease and dust.

Application:

Apply *Pufas Click-Safe* onto the top side of the spring when laying then lay as usual. Immediately wipe off the residues protruding in the process using a damp cloth.

An invisible protection seal will form after through drying (approx. 1 day).

Do not process below +5° Celsius sub-floor and room temperature!
Clean any working equipment immediately with water after use.

Storage:

Keep cool but protect from frost! Keep container well closed!

Available size:

250 g PE tube 008306092 4007954083062
